

# ZACHARY BIENSTOCK

Hawthorne, NJ | 973-803-6121 | zbienstock@gmail.com | zachbienstock.com

## SUMMARY

Finance and operations professional with 5+ years across financial services, telecom, and startup environments. Owns accounts payable, accounts receivable, commissions, and month-end close while building the automation behind them, replacing manual spreadsheet work with systems that cut an estimated 30+ hours of document handling and data entry out of every month.

## EXPERIENCE

### Financial Operations Analyst, Full Time

06/2026 to Present

*Interactive Telecom Solutions & Platform Technologies | New Jersey*

- Own day-to-day financial operations across two affiliated telecom entities, covering accounts payable, accounts receivable, QuickBooks bookkeeping, reconciliation, and month-end close.
- Reconcile monthly carrier and agent commission statements across a multi-carrier book of business, validating carrier payouts against contracted rates and calculating downstream agent commissions.
- Automated the accounts payable pipeline end to end: invoices and carrier statements are ingested, renamed, filed, and converted into IIF journal files that import directly into QuickBooks, eliminating an estimated **30+ hours of manual document handling and data entry per month**.
- Automated month-over-month comparison of carrier commission statements to surface missing, changed, and underpaid line items, catching revenue leakage that manual review was too time-consuming to find consistently.
- Built an internal operations platform consolidating invoice processing, commission reconciliation, revenue reporting, and document management into one system, replacing scattered spreadsheets and ad-hoc manual workflows.
- Built reporting tools that assemble FCC Form 499-Q filings directly from billing data and track recurring revenue, margin, and carrier performance, plus internal utilities for credential management and company-wide document search.
- Primary point of contact for carriers, agents, and customers, resolving billing disputes, commission discrepancies, and payment issues end to end.

### Savings Analyst & Sales Engineer, Full Time

02/2024 to 10/2025

*Grapevine | New York City*

- Independently built financial models using advanced Excel formulas, macros, and AI-assisted automation to quantify cost savings and ROI, including automated email and Slack notifications triggered by data updates, cutting manual reporting by 80%+.
- Designed and maintained KPI dashboards in Figma and Excel, consistently demonstrating 40%+ average cost savings across client accounts and presenting results to senior stakeholders.
- Conducted variance and spend analysis across tens of thousands of product groups, delivering optimized substitutions generating 20 to 85% savings with annual client impact from thousands to millions.
- Resolved 50+ weekly backorders and supported client and vendor onboarding across a national network, improving retention and fulfillment.

### Financial Data Analyst, Surveillance & Threat Detection

04/2023 to 02/2024

*Bloomberg LP | Remote*

- Extracted, analyzed, and validated large-scale financial datasets, including derivatives, options, swaps, and forwards, to surface key metrics and identify outlier trends across diverse data sources.
- Contributed to a validated database supporting AI-based trade assessment; tagged and verified surveillance-relevant data points within client text alongside senior analysts, improving model accuracy and target detection.

### Operations & Marketing Coordinator, Part Time

07/2023 to 06/2026

*Reflect Medical & Cosmetic Center | Hawthorne, NJ*

- Managed financial operations using QuickBooks, including transaction entry, account reconciliation, expense tracking, and purchase order workflows to maintain accurate records.
- Leveraged AI tools to produce marketing content, digital assets, and social media materials; coordinated cross-functional workflows across procurement, vendor management, and marketing.

### Investment Banking Intern

02/2022 to 02/2023

*Cambridge Wilkinson | New York City*

- Researched middle-market companies to support debt and equity capital raises from \$25MM to \$1B; built detailed target lists with financial metrics for live deal origination.
- Supported client and investor meetings, helping present financing opportunities to middle-market firms and large institutional investors.

## FREELANCE

- **Web3 Project Advisor (Crypto Advisor & KOL):** Advised early-stage Web3 projects on utility design, token launches, marketing strategy, and community growth. Supported multiple launches reaching \$1M+ market cap.
- **Computer Technician:** Built, configured, and sold 50+ custom desktop computers through eBay; diagnosed and repaired hardware and software issues across personal and client devices.

## SKILLS

- **Financial Operations:** AP/AR, month-end close, reconciliation, carrier and agent commission accounting, FCC Form 499-Q revenue reporting, QuickBooks
- **Process Automation:** Workflow design, document intake and filing, IIF journal generation and QuickBooks imports, automated statement comparison
- **Analytics & Modeling:** ROI modeling, KPI dashboards, variance analysis, revenue and spend tracking, expected vs. actual analysis, Advanced Excel and Google Sheets
- **Technical:** Full-stack internal application development (JavaScript/React, Python, SQL, HTML/CSS); Git/GitHub, Vercel, Railway; LLM APIs and AI-assisted build workflows
- **Data, BI & Systems:** SQL, Metabase, Bloomberg Terminal, Figma, Jira, Asana, Linear, Slack, Front, Salesforce
