Work Experience

Financial Operations Analyst – Full Time

06/2026 to Current
New Jersey

Interactive Telecom Solutions & Platform Technologies

- Own day-to-day financial operations across two affiliated telecom entities, covering accounts payable, accounts receivable, QuickBooks bookkeeping, reconciliation, and month-end close.
- Reconcile monthly carrier and agent commission statements across a multi-carrier book of business, validating carrier payouts against contracted rates and calculating downstream agent commissions.
- Automated the accounts payable pipeline end to end: invoices and carrier statements are ingested, renamed, filed, and converted into IIF journal files that import directly into QuickBooks, eliminating an estimated **30+ hours of manual document handling and data entry per month**.
- Automated month-over-month comparison of carrier commission statements to surface missing, changed, and underpaid line items, catching revenue leakage that manual review was too time-consuming to find consistently.
- Built an internal operations platform consolidating invoice processing, commission reconciliation, revenue reporting, and document management into one system, replacing scattered spreadsheets and ad-hoc manual workflows.
- Built reporting tools that assemble FCC Form 499-Q filings directly from billing data and track recurring revenue, margin, and carrier performance, plus internal utilities for credential management and company-wide document search.
- Primary point of contact for carriers, agents, and customers, resolving billing disputes, commission discrepancies, and payment issues end to end.

Operations & Marketing Coordinator – Part Time

07/2023 to 06/2026
Hawthorne, NJ

Reflect Medical & Cosmetic Center

- Supported financial operations in QuickBooks, including transaction entry, reconciliation, expense tracking, and purchase order workflows.
- Managed medical supply inventory and procurement; created purchase orders, verified invoices against deliveries, and resolved vendor discrepancies to ensure timely restocking.
- Designed marketing and promotional materials, digital assets, and social content in Canva while supporting daily administrative and operational workflows.

Savings Analyst and Sales Engineer – Full Time

02/2024 to 10/2025
New York City

Grapevine

- Built customer savings reports using advanced Excel formulas and Figma dashboards, consistently highlighting 40%+ average cost savings.
- Designed and maintained automated Excel systems with macros, scripts, and email integrations, reducing manual analysis and reporting by 80%+.
- Analyzed tens of thousands of product groups to deliver optimized substitutions, generating 20 to 85% savings and annual client impact from tens of thousands to millions.
- Conducted ongoing fidelity checks, resolved 50+ weekly backorders, and supported client and vendor onboarding, improving retention and fulfillment.

Financial Data Analyst – IB/ASR/Surveillance/Threat Detection

04/2023 to 02/2024
Remote

Bloomberg LP

- Enhanced machine learning surveillance models by extracting, analyzing, and validating large financial datasets to surface key metrics and identify outlier trends across diverse data sources.
- Evaluated derivatives and trade activity, including options, swaps, and forwards, to maintain a validated database supporting AI-based trade assessment; tagged and verified surveillance-relevant data points alongside senior analysts to improve model accuracy.

Investment Banking Intern

02/2022 to 02/2023
New York City

Cambridge Wilkinson

- Researched middle-market companies to support debt and equity capital raises from \$25MM to \$1B; built target lists with executive contacts and key financial metrics for live deal origination.
- Supported client and investor meetings presenting financing opportunities to middle-market firms and institutional investors.
