

ZACHARY BIENSTOCK

Hawthorne, NJ | 973-803-6121 | zbienstock@gmail.com | zachbienstock.com

SUMMARY

Finance and operations professional with 5+ years across financial services, telecom, and startup environments — owning AP/AR, commissions, and month-end close while building the internal software that runs them. Combines hands-on financial operations with full-stack tool development to replace manual spreadsheet workflows with automated, auditable systems.

EXPERIENCE

Financial Operations Analyst — Full Time

06/2026 – Present

Interactive Telecom Solutions & Platform Technologies | New Jersey

- Own day-to-day financial operations across two affiliated telecom entities — accounts payable, accounts receivable, QuickBooks bookkeeping, reconciliation, and month-end close.
- Process and reconcile monthly carrier and agent commission statements, validating carrier payouts against contracted rates and calculating downstream agent commissions across a multi-carrier book of business.
- Designed and built **Home Base**, an internal operations platform consolidating finance, commission, and administrative workflows into a single application — replacing scattered spreadsheets and manual processes.
- Built an **AP Console** and **Commissions module** automating invoice intake, approval routing, commission calculation, and payout tracking, plus a **Statement Comparison tool** that diffs carrier statements month over month to surface missing, changed, and underpaid line items.
- Built a **499-Q Builder** that assembles FCC Form 499-Q revenue reporting directly from billing data, a **revenue analytics tool** for recurring revenue and margin tracking, and internal utilities including a credential **password manager** and a document **file finder**.
- Primary point of contact for carriers, agents, and customers — resolving billing disputes, commission discrepancies, and payment issues end to end.

Savings Analyst & Sales Engineer — Full Time

02/2024 – 10/2025

Grapevine | New York City

- Independently built financial models using advanced Excel formulas, macros, and AI-assisted automation to quantify cost savings and ROI — including automated email and Slack notifications triggered by data updates — reducing manual reporting by 80%+.
- Designed and maintained KPI dashboards in Figma and Excel, consistently demonstrating 40%+ average cost savings across client accounts and presenting results to senior stakeholders.
- Conducted variance and spend analysis across tens of thousands of product groups, delivering optimized substitutions generating 20–85% savings with annual client impact ranging from thousands to millions.
- Resolved 50+ weekly backorders and supported client and vendor onboarding across a national network, improving retention and fulfillment.

Financial Data Analyst — IB/ASR/Surveillance/Threat Detection

04/2023 – 02/2024

Bloomberg LP | Remote

- Extracted, analyzed, and validated large-scale financial datasets — including derivatives, options, swaps, and forwards — to surface key metrics and identify outlier trends across diverse data sources.
- Contributed to a validated database supporting AI-based trade assessment; tagged and verified surveillance-relevant data points within client text alongside senior analysts, improving model accuracy and target detection.

Operations & Marketing Coordinator — Part Time

07/2023 – 06/2026

Reflect Medical & Cosmetic Center | Hawthorne, NJ

- Managed financial operations using QuickBooks, including transaction entry, account reconciliation, expense tracking, and purchase order workflows to maintain accurate records.
- Leveraged AI tools to produce marketing content, digital assets, and social media materials; coordinated cross-functional workflows across procurement, vendor management, and marketing.

Investment Banking Intern

02/2022 – 02/2023

Cambridge Wilkinson | New York City

- Researched middle-market companies to support debt and equity capital raises ranging from \$25MM to \$1B; built detailed target lists with financial metrics for live deal origination.
- Supported client and investor meetings, helping present financing opportunities to middle-market firms and large institutional investors.

FREELANCE

- **Web3 Project Advisor (Crypto Advisor & KOL):** Advised early-stage Web3 projects on utility design, token launches, marketing strategy, and community growth. Supported multiple launches reaching \$1M+ market cap.
- **Computer Technician:** Built, configured, and sold 50+ custom desktop computers through eBay; diagnosed and repaired hardware and software issues across personal and client devices.

SKILLS

- **Financial Operations:** AP/AR, month-end close, reconciliation, carrier & agent commission accounting, FCC Form 499-Q revenue reporting, QuickBooks
- **Analytics & Modeling:** ROI modeling, KPI dashboards, variance analysis, revenue/spend tracking, expected vs. actual analysis, Advanced Excel & Google Sheets (macros, automation, pivot tables)
- **Internal Tooling:** Full-stack internal application development (JavaScript/React, Python, SQL, HTML/CSS); Git/GitHub, Vercel, Railway
- **AI Tools:** Claude, ChatGPT, Gemini, LLM APIs — daily use for analysis, automation, and software development
- **Data, BI & Systems:** SQL, Metabase, Bloomberg Terminal, Figma, Jira, Asana, Linear, Slack, Front, Salesforce
